Microsoft Settlement.

My name is Dong hyub Cho. I would like to talk about my opinion with Microsoft and U.S.

Microsofts monopolized most of the world market, thus many problem are generated.

The big problem that we can consider is that a right of consumers who want to choose their taste of verity things was lost by Microsofts.

Second, as Microsofts sells their product with explore and media player, products such as internet surfing and multimedia ones made by other companies sustain a loss. By according to EUj s opinion, intentionally Microsofts is designed not to work software made by other company in Window products well, so Microsofts limited competition with others.

Last, by according to security professor who works at IT, personal information in computer can be hacked easily. Whenever many people surf internet, usually they use Explore program in windows. If the cookies that contain personal information were stolen away, cracker can steal someonej s money from bank.

Even though, at the beginning time, when window 3.0 appeared in the world, there are other O/S that people can use in their computer, the reason Why Microsofts can monopolize their field is simple. The answer, why Windows products are used by many people is that those are good and easy for public.

But nowadays, we lost our right to choose O/S and there are some problems which I mention above, so I think that huge dinosaur, Microsofts must be divided, as if AT&T was divided. I understand that in these days, U.S. economy is not good and if Microsofts is divided, there are no advantages to help for economy to be active; however viewed in long time, it will be good for both of the public and economy. Through many competitions with companies, the public can use their program with cheap and good quality.

I think that if O/S such as LINUX or P/S elevate their program for the public to approach more easily and Microsofts is divided with, naturally both of the public to use computer and government can find solution and live with good computer communicate life.
